

Demineralized Water for Battery 1L

Use TOTAL demineralized water for tops-up. It does not cause fur deposits or other side reactions and helps to improve ion exchanges between the anode and cathode. Unsuitable for dry-cell batteries.

Product & Conditioning

Pack	Can 1 L
Pack color	Transparent
Pack dimensions	23 x 8,5 cm
Closure	40 mm cap with protector
Cap color	Black
Pack per box	12
Dimensions box	35,9 x 27,2 x 25,1 cm

Product Advantages

**Stops furring
Extends battery life**

**Transparent can to visualize the
quality and cleanness of the
product**

No hazardous product.
